## Project Design Phase-II

## **Solution Requirements (Functional & Non-functional)**

Date	03 October 2022
Team ID	PNT2022TMID17847
Project Name	Airline Data Analytics for Aviation Industry
Maximum Marks	4 Marks

## **Functional Requirements:**

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Customer usage of web page	Customer can open the web page for Delay report
FR-2	Delay prediction	After the entering required attribute, the customer will get delay rate.
FR-3	Visualizing data	User can visualize the Regular trends of delay of flights Using IBM cognos Analytics
FR-4	Generating Report	User can view the flight delay report

## **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application will have a simple and user-friendly graphical interface. Users will be able to understand and use all the features of the application easily. Any action has to be performed with just a few clicks
NFR-2	Security	The main security concern is for users hence proper mechanism should be used to avoid hacking. The organization system should not disclose personal information of users and otherorganization details to public.
NFR-3	Reliability	When the system is disconnected or frozen due to over access at the same time, it should save all the process of the users made up to the point of abnormal happenings.
NFR-4	Performance	The system should require a fair amount of speed especially while browsing through the catalogue.
NFR-5	Availability	The system shall be available 24 hours a day 7 days a week. User can access at any time.
NFR-6	Scalability	Large Number of users can access the website
